**SCOPE OF THIS DOCUMENT**

This pack records which checks were performed on one payment, with which data, list versions and rule versions, and which decision the processor signed and executed on-chain. It does not certify that the funds are legitimate and is not legal advice. Deflow is a technology provider: it holds no keys and no client funds, and every decision in this pack was taken and signed by the processor.

**Source codes** — CHAIN public on-chain data · PAYER supplied by the payer at checkout · PROVIDER external provider (KYT, sanctions lists, timestamp authority), reproduced unmodified · DEFLOW computed by the Deflow engine · PROCESSOR data or decision of the processor.

## A Payment identification

The on-chain transfer this pack refers to. Every other section is bound to this transaction hash.

**RENDERING RULE**

Off-ramp profile: show originator name and country only; replace every other originator field with the withheld marker. Bank profile: withhold all originator fields. Auditor profile: pseudonymise; the re-identification key stays with the processor.

## C Wallet ownership evidence

Proof that the payer controlled the sending address at the time of payment. Required for self-hosted addresses above EUR 1,000; may be applied at lower amounts by policy.

Disclosure — Off-ramp: Method, result, signature · Bank: Result only · FIU / supervisor: Full · Auditor: Full

**RENDERING RULE**

State only what the signature shows: control of the address by the payer. Where the payer is not the processor's customer, how this evidence is used is set by the processor's policy; do not describe it as completing a specific legal requirement.

## D Transaction screening (KYT)

Result returned by the processor's blockchain-analytics provider, reproduced without modification.

## I Timeline

Every state change of the payment, on-chain and off-chain, in order.

Disclosure – Off-ramp: On-chain statuses only · Bank: On-chain statuses only · FIU / supervisor: Full · Auditor: Full

| Time (UTC) | Event                                      | On-chain status | Reference                      | Source    |
|------------|--------------------------------------------|-----------------|--------------------------------|-----------|
| {{t}}      | Travel Rule data received                  | —               | {{travel_rule.ref}}            | PAYER     |
| {{t}}      | Wallet signature verified                  | —               | —                              | DEFLOW    |
| {{t}}      | Payment received in deposit contract       | PENDING         | {{onchain.tx_hash}}            | CHAIN     |
| {{t}}      | KYT result received                        | —               | {{kyt.external_ref}}           | PROVIDER  |
| {{t}}      | Sanctions and structuring checks completed | —               | —                              | DEFLOW    |
| {{t}}      | Decision signed by processor               | —               | {{decision.signatur<br>e_ref}} | PROCESSOR |
| {{t}}      | Decision executed by contract              | {{status}}      | {{decision.executio<br>n_tx}}  | CHAIN     |

### RENDERING RULE

On-chain statuses are deliberately neutral: PENDING, HELD, CREDITED, RETURNED. A freeze and an ordinary review both appear on-chain as HELD; never expose the reason on-chain.

## J Decision

The decision taken and signed by the processor, and its on-chain execution.

Disclosure – Off-ramp: Outcome only · Bank: Outcome only · FIU / supervisor: Full, incl. officers · Auditor: Full

### RENDERING RULE

FREEZE has no technical path to RETURN. Funds stay in the deposit contract until the competent authority gives instructions. Off-ramp and bank profiles show the outcome only.

## K Integrity and verification

How the recipient can check that this pack is authentic, complete and unchanged — without trusting Deflow.

Disclosure — Off-ramp: Full · Bank: Full · FIU / supervisor: Full · Auditor: Full

|                       |                                                                                                  |           |
|-----------------------|--------------------------------------------------------------------------------------------------|-----------|
| Pack hash             | sha256:{{integrity.pack_hash}} over RFC 8785 canonical JSON                                      | DEFLOW    |
| Machine-readable pack | {{integrity.json_filename}}, embedded in this PDF (PDF/A-3)                                      | DEFLOW    |
| Processor signature   | {{integrity.sig_alg}} · key {{integrity.key_id}} · certificate {{integrity.cert_fingerprint}}    | PROCESSOR |
| Timestamp             | {{integrity.tsa}} · {{integrity.ts_time}} · serial {{integrity.ts_serial}} (RFC 3161, qualified) | PROVIDER  |
| Anchor                | Merkle root {{integrity.anchor_root}} in tx {{integrity.anchor_tx}}; no personal data on-chain   | CHAIN     |
| Previous pack hash    | sha256:{{integrity.prev_pack_hash}} (processor journal)                                          | DEFLOW    |
| Retention             | until {{retention.until}} · legal hold {{retention.legal_hold}}                                  | PROCESSOR |

### HOW TO VERIFY

1. Verify the processor's signature over the embedded JSON using the certificate published at {{processor.cert\_url}}.
  2. Validate the RFC 3161 timestamp token against the timestamp authority's certificate.
  3. Look up {{onchain.tx\_hash}} and {{decision.execution\_tx}} in any block explorer for chain ID {{onchain.chain\_id}}.
  4. Recompute SHA-256 over the canonical JSON (RFC 8785) and check its inclusion in the anchored root using the attached proof.
- Open-source verifier: {{verifier\_url}}.

## Annex 1 · Disclosure profiles

One master pack is kept unredacted by the processor. Each recipient receives a projection generated from it; the master record itself is never edited.

| Language             | English; the processor may add a local-language summary page.                            |

Annex 3 · Reporting

FIU / SUPERVISOR PROFILE ONLY

Include this annex only in the FIU\_SUPERVISOR and MASTER profiles. In every other profile omit it entirely — heading, page and any reference — so that its absence cannot be inferred. Disclosing that a report was made, or that an analysis is under way, is prohibited.

|                               |                                                                                                                                                          |           |
